Shaping the Future of Elder Care, Together

Who We Are

Care4Elder Health Partners is a specialized elder care organization dedicated to bridging the critical gap between clinical treatment and sustained recovery at home. We connect hospitals, diagnostic centers, Doctors and families into a seamless continuum of care — ensuring no elder is left unsupported after discharge.

Patient-Centered

Every decision starts with the elder's wellbeing

Partnership-Driven

Stronger together with healthcare collaborators

Tech-Enabled

Smart tools for smarter care delivery

Our Mission

To ensure every elder receives dignified, continuous, and compassionate care — from hospital admission through full recovery at home — by uniting the best healthcare partners in a shared ecosystem of trust and excellence.

Continuity of Care

No gaps between discharge and recovery

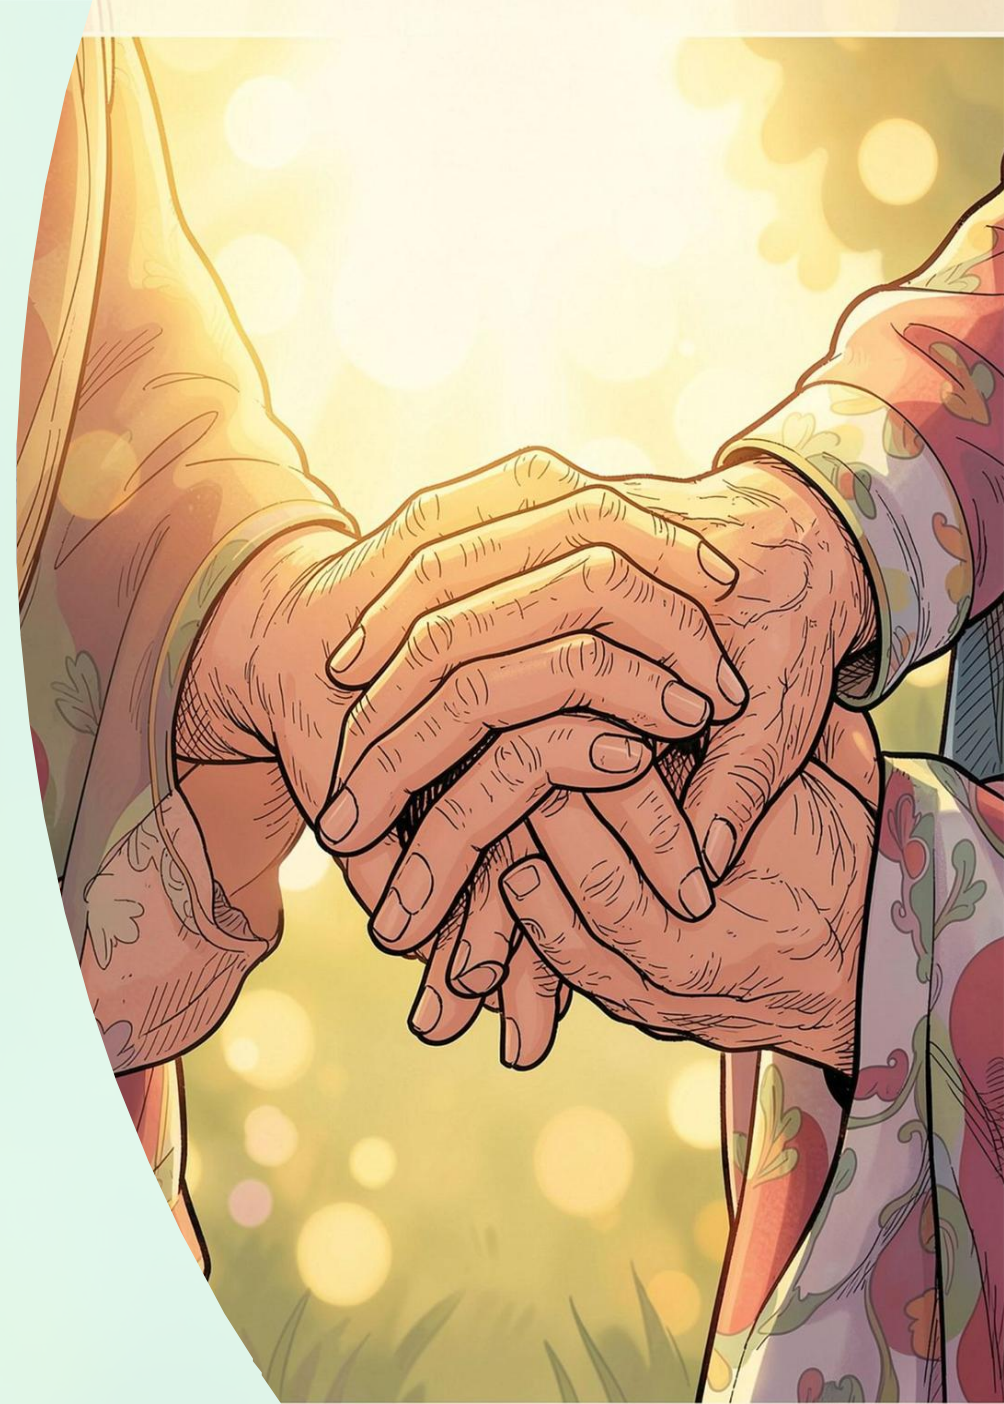

Dignity & Safety

Every elder deserves respectful, monitored care

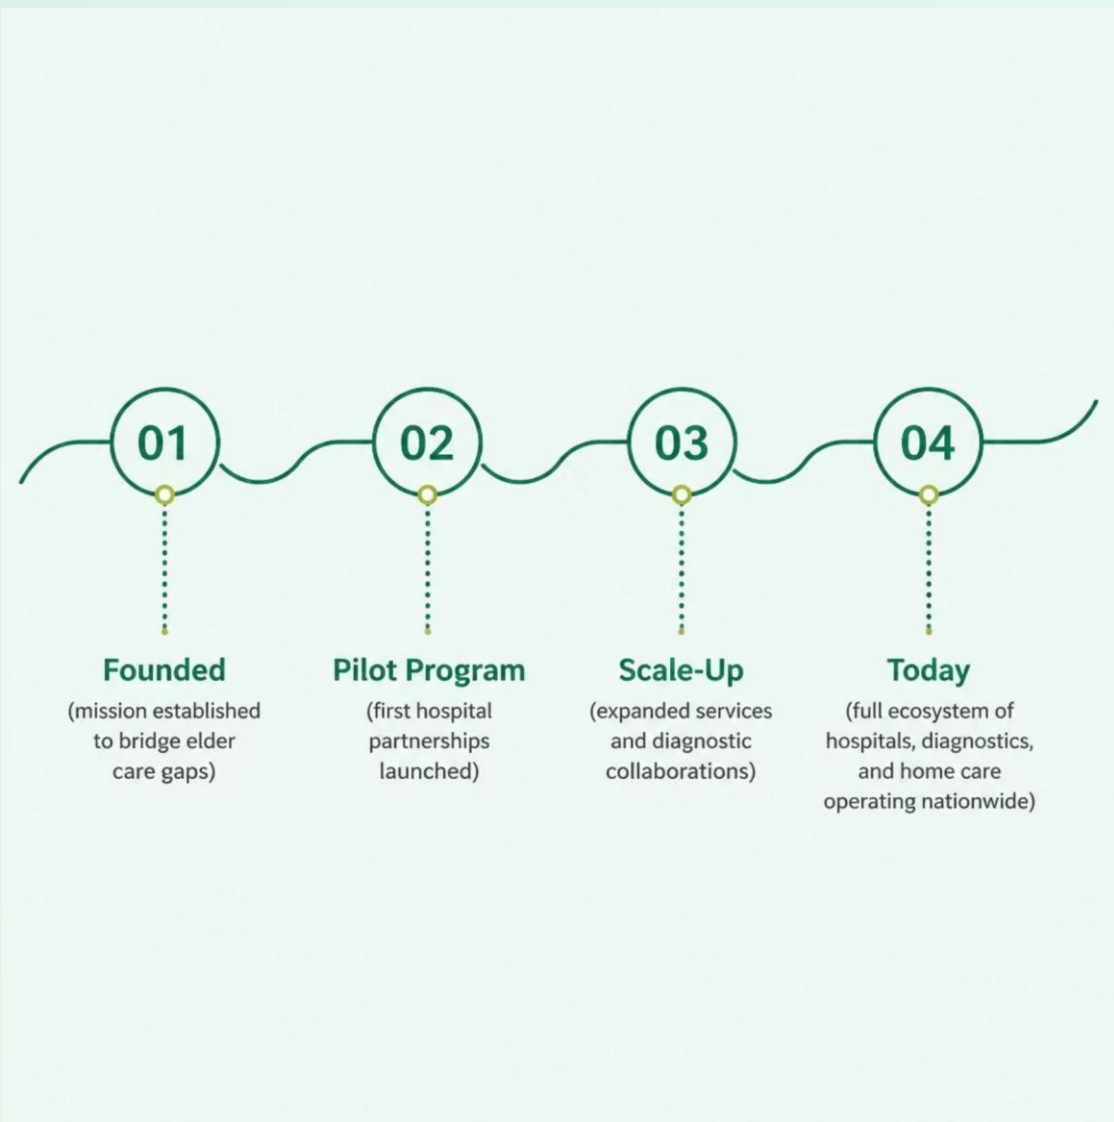

Partner Empowerment

Enabling hospitals and diagnostics to do more

Our Journey & Services

From a single pilot program to a nationwide elder care network, Care4Elder has grown by staying true to one principle: **every elder deserves a complete circle of care.**

Post-Discharge Home Care
Monitored recovery with trained caregivers

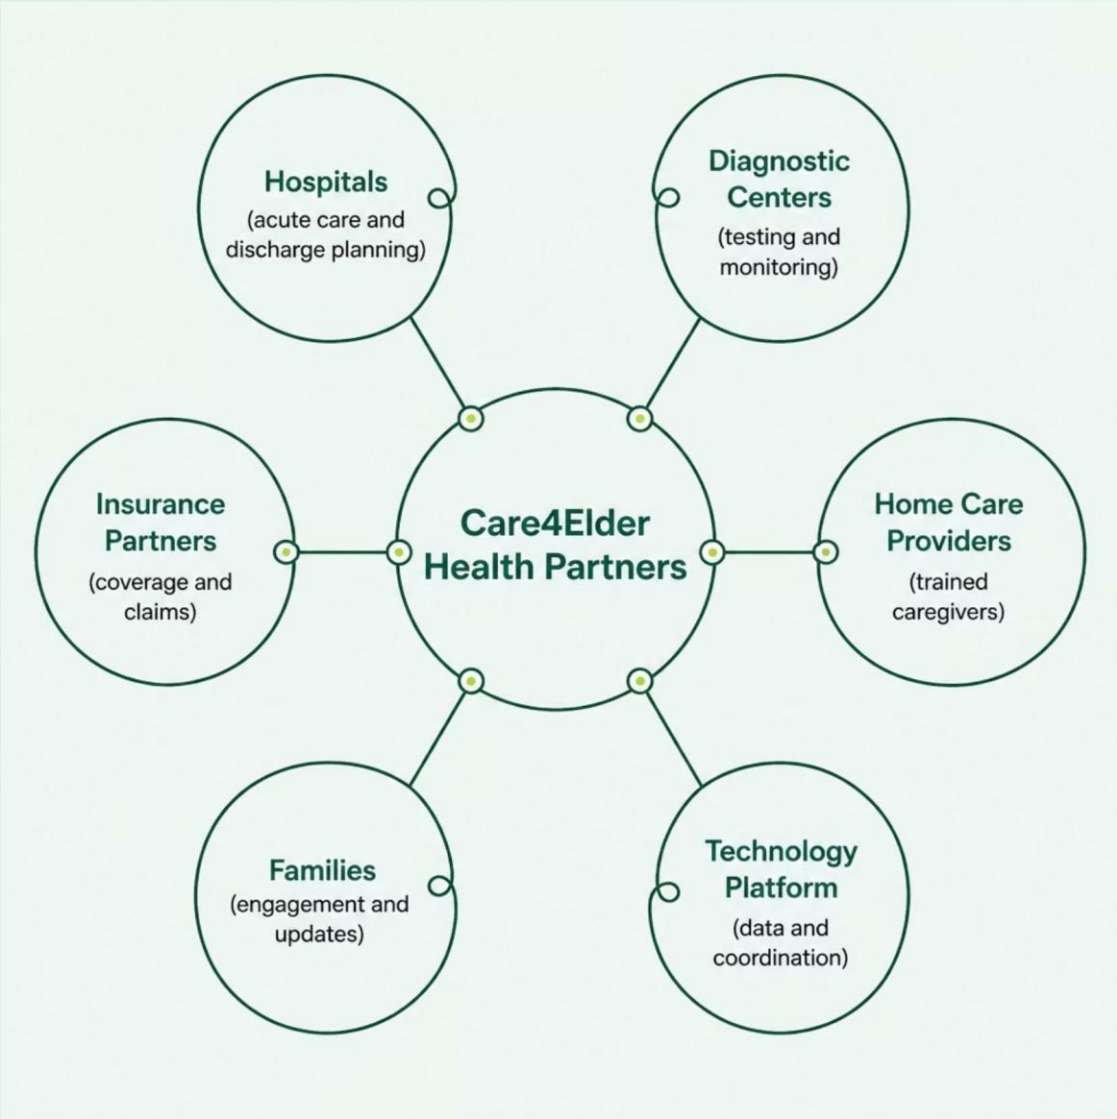

Chronic Disease Management
Ongoing support for long-term conditions

Diagnostic Coordination
Seamless test scheduling and result tracking

Family Engagement Portal
Real-time updates for concerned families

The Synergy Ecosystem

Care4Elder sits at the center of a connected care network — uniting hospitals, diagnostic centers, caregivers, and families into one seamless ecosystem designed around the elder's complete journey.

Where Collaboration Creates Value

Each partner segment plays a distinct role, but it is the **connection between them** — orchestrated by Care4Elder — that closes the most dangerous gap in elder healthcare: the period after discharge when patients are most vulnerable.

Our ecosystem model ensures that no elder falls through the cracks — and no partner carries the burden alone.

The Healthcare Gap We're Closing

For millions of elders, the most dangerous moment in their care journey is the one nobody sees — **the moment they leave the hospital**. Without structured post-discharge support, readmission rates climb, outcomes worsen, and families are left unprepared.

1

Admitted

Acute care in hospital

2

Discharged

Care gap begins here

3

At-Risk

No monitoring, no support

4

Readmitted

Preventable crisis

Care4Elder intercepts this cycle — providing structured home monitoring, caregiver support, and clinical coordination that keeps elders recovering safely at home.

Why Hospitals Partner With Us

Hospitals excel at acute care. Care4Elder extends that excellence beyond the discharge door — reducing readmissions, improving outcomes, and strengthening your reputation for comprehensive patient care.

Reduce Readmission Rates

Structured post-discharge monitoring significantly lowers preventable returns

Free Up Clinical Capacity

Our home care teams handle recovery so your staff focuses on acute cases

Strengthen Patient Satisfaction

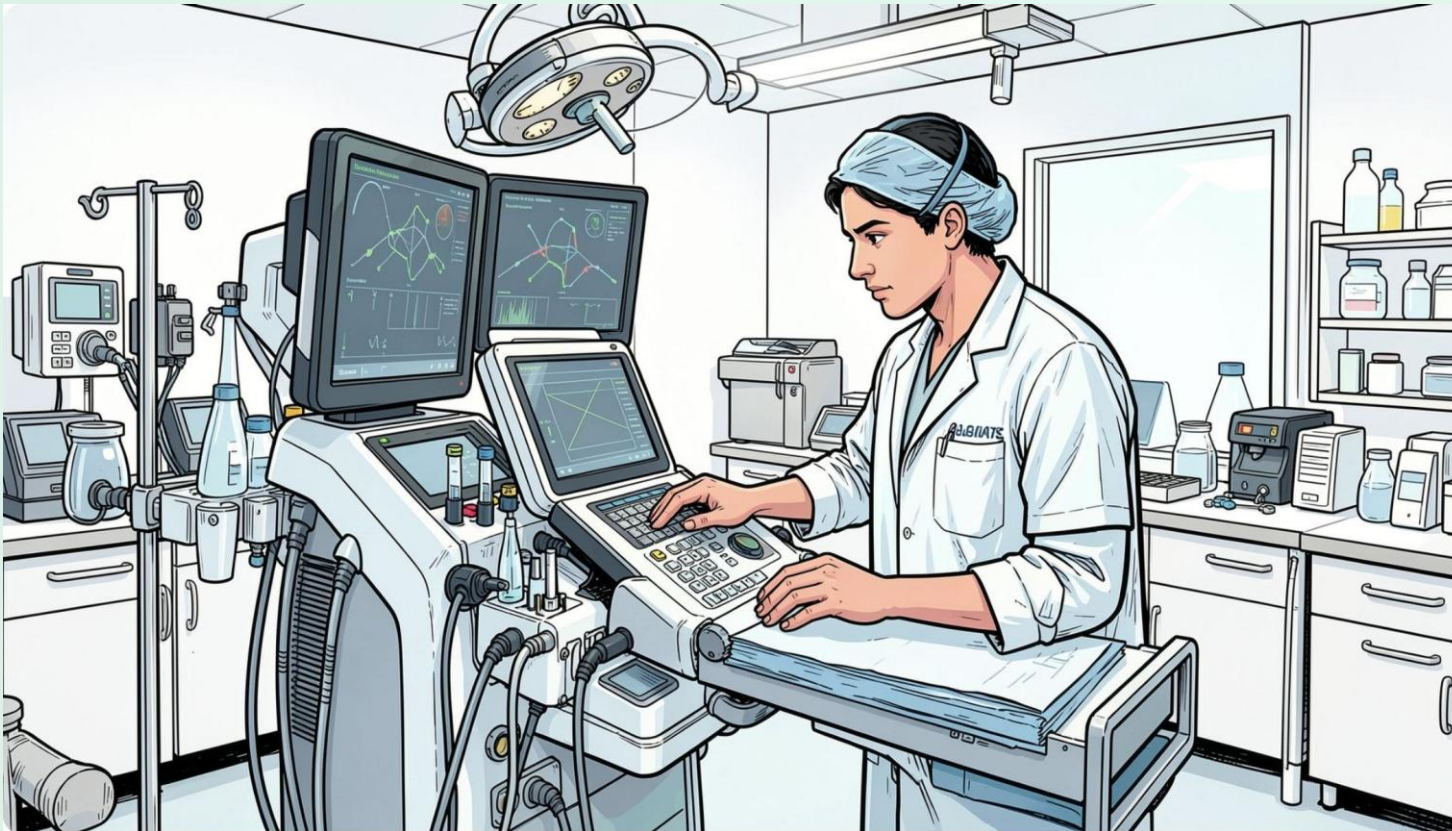

Families feel supported; outcomes improve; your NPS scores reflect it

Generate Referral Revenue

Mutual referral structure creates a sustainable revenue stream

Why Diagnostic Centers Partner With Us

Diagnostic centers are a critical node in elder care — yet most patient referrals end at the test result. Care4Elder ensures those results drive action, creating a continuous loop of testing, monitoring, and care that benefits everyone.

Consistent Referral Flow

Our care coordinators route elders to partner diagnostics for ongoing monitoring

Growth in Test Volume

Chronic care management drives recurring diagnostic needs

Integrated Care Pathways

Test results feed directly into personalized elder care plans

Revenue Share Model

Mutual referrals create predictable, growing income for both parties

Powered by Technology

Care4Elder's technology platform is the connective tissue of our ecosystem — enabling real-time coordination between hospitals, diagnostics, caregivers, and families with precision and transparency.

Care Coordination Platform

Unified dashboard for care teams to manage patient journeys, assign tasks, and track outcomes in real time

Remote Monitoring & Telehealth

Connected devices and video consultations keep clinicians informed without requiring in-person visits

Family Engagement Portal

Families receive real-time updates, care notes, and alerts — reducing anxiety and improving adherence

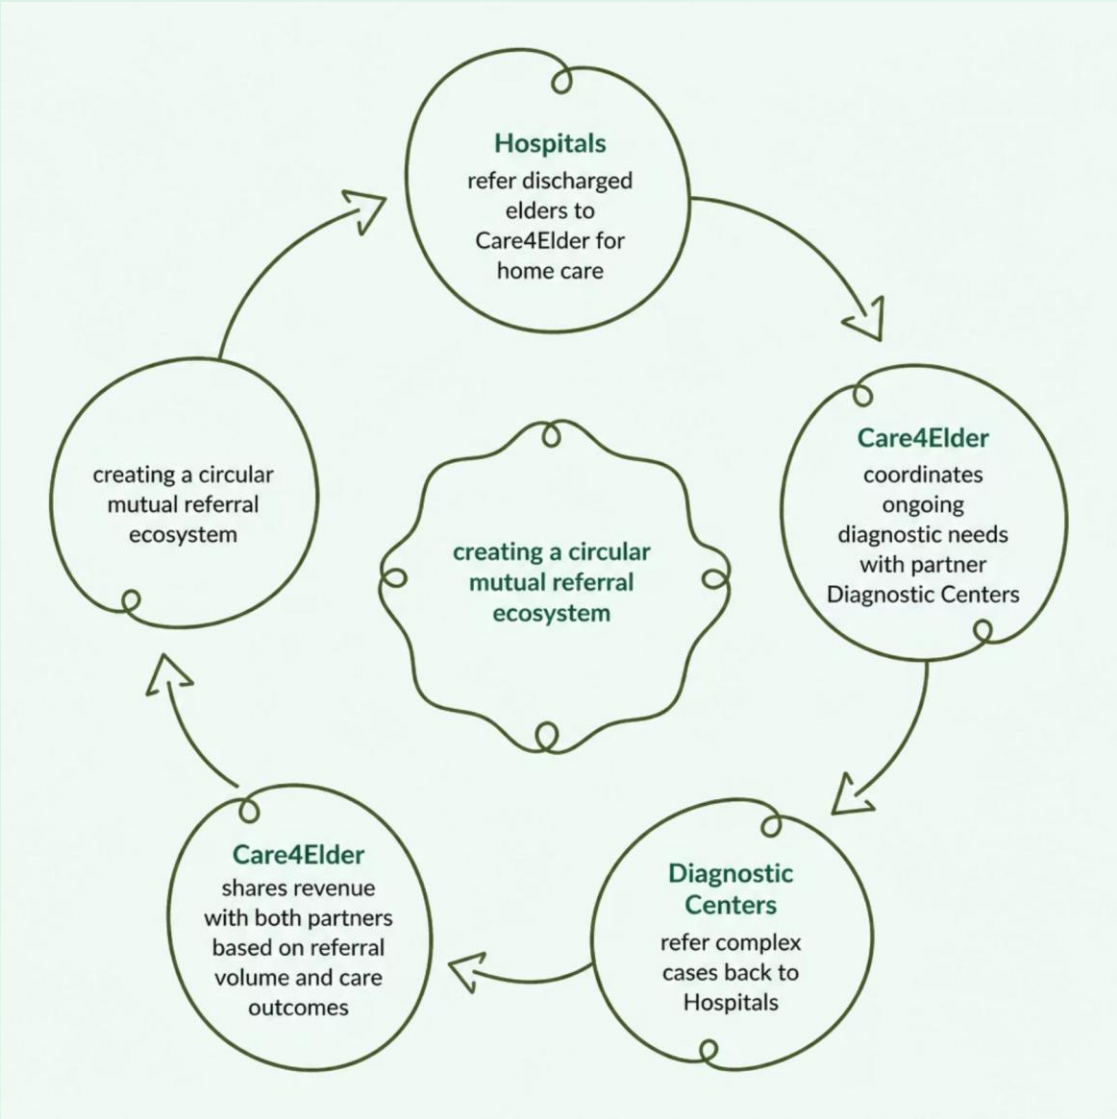

Outcomes Analytics

Data-driven insights help partners measure impact, optimize protocols, and demonstrate value

The Commercial Architecture

Our partnership model is built on **mutual value** — a structured revenue-sharing framework that rewards both hospitals and diagnostic centers for every referral while keeping the elder at the center of every decision.

How It Works

Hospital → Care4Elder

Hospitals refer discharged elders; receive revenue share on home care contracts

Diagnostics → Hospital

Complex findings are routed back to hospital partners for intervention

Care4Elder → Diagnostics

Ongoing monitoring drives recurring diagnostic referrals to partner centers

Shared Outcomes Bonus

Partners earn additional revenue when patient outcomes exceed benchmarks

🔄 We choose you because your expertise completes this circle of care. [Learn more at care4elder.com](https://care4elder.com)
